You cannot generate private key from public key but you can generate public key from the private key using puttygen. As @alfasin mentioned if you could generate the private key from public key then RSA would be useless and this would make you vulnerable to attack.FYI the public key is used for encryption and private key is used for decryption.

putty - Can i generate private key from last public key ...

Foreign keys have to match the primary/unique key they reference column for column. Since the primary key of BOOKING_REFERENCE is (REFERENCE_ID, CUST_ID), that means that the foreign key from BR_FLIGHT to BOOKING_REFERENCE must consist of 2 columns also. That means you need to add CUST_ID to the BR_FLIGHT table - either that or your BOOKING_REFERENCE primary key is wrong and should just be ...

For non-techies on Facebook, use workaround seen on Wikipedia: ☒ Win. Since you want to display the character on the Facebook where you have no control over fonts and there is no such character in Unicode at the moment, you can use mathematical operator Squared Plus (code point 229E) to imitate Windows logo as Wikipedia does in article on Windows key and in other keyboard-related articles.

Is there a unicode character for the Windows key? - Super User

All too often young children fail to remember the names of pattern block shapes. Over the years, Kristin Garrison has found that if teachers don't give students frequent opportunities to use pattern block names and become familiar with the attributes of the shapes, when handling pattern blocks after they leave kindergarten and first grade, they...
