### Chapter 15 Patterns Of Evolution

My book, Encyclopedia of Chart Patterns is to human anatomy as Chart Patterns: After the Buy is to human behavior. Chart Patterns: After the Buy shows how a stock acts after a chart pattern appears, so we can use that knowledge before buying to boost the odds of trading success. It covers chart patterns, but from a different perspective than all of my other books.

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

Evolutionary economics is part of mainstream economics as well as a heterodox school of economic thought that is inspired by evolutionary biology. Much like mainstream economics, it stresses complex interdependencies, competition, growth, structural change, and resource constraints but differs in the approaches which are used to analyze these phenomena.

Where does the mRNA come from? As soon as mRNA starts getting transcribed, ribosomes attach to translate: In bacteria, nearly all translation occurs on growing mRNA still being transcribed.; In eukaryotes, 15% of translation occurs on growing mRNA. The purpose of translating incomplete RNA in the nucleus may be to eliminate errors that result in stop codons terminating the peptide.
