Desmos Classroom Activities

In this section we will discuss the only application of derivatives in this section, Related Rates. In related rates problems we are given the rate of change of one quantity in a problem and asked to determine the rate of one (or more) quantities in the problem. This is often one of the more difficult sections for students. We work quite a few problems in this section so hopefully by the end of ...

Calculus I - Related Rates - Pauls Online Math Notes

Section 2-2 : Surface Area. In this section we are going to look once again at solids of revolution. We first looked at them back in Calculus I when we found the volume of the solid of revolution. In this section we want to find the surface area of this region.

Calculus II - Surface Area - tutorial.math.lamar.edu

Two kinds of logarithms are often used in chemistry: common (or Briggian) logarithms and natural (or Napierian) logarithms. The power to which a base of 10 must be raised to obtain a number is called the common logarithm (\log) of the number. The power to which the base e ($e = 2.718281828\dots$) must be raised to obtain a number is called the natural logarithm (\ln) of the number.

Math Skills - Logarithms

How to Improve Math Skills. Math can be a difficult subject, particularly if you don't have the right skills in place. But once you know how to approach it strategically, you'll likely find it less frustrating and have much higher chances...
