A biome is a region of vegetation and the associated animal community that has developed in response to climatic and other abiotic factors such as temperature, precipitation such as rainfall, and latitude. Biomes that occur at lower latitudes are warmer and wetter than those at higher latitudes ...

Difference Between Biome and Ecosystem

Hot or cold? Wet or dry? North America has a wide range of different climate zones. In the third lesson in this unit, children find out more about the climate in three specific areas of North America and compare this to the climate of their own school area.

Comparing Climates in the Americas Lesson Plan 3 - Year 6 ...

Recent literature has linked several facets of gut health with the onset of T1D in humans and rodent models 4,6,10. Altered intestinal microbiota in connection to T1D has been reported in Finnish 7 ...

The human gut microbiome in early-onset type 1 diabetes ...

Ecology; Ecology addresses the full scale of life, from tiny bacteria to processes that span the entire planet. Ecologists study many diverse and complex relations among species, such as predation and pollination. The diversity of life is organized into different habitats, from terrestrial (middle) to aquatic ecosystems.

Chaparral (/ ˌ ʃ æ p ə ˈ r æ l /) is a shrubland or heathland plant community found primarily in the US state of California and in the northern portion of the Baja California Peninsula, Mexico. It is shaped by a Mediterranean climate (mild, wet winters and hot dry summers) and wildfire, featuring summer-drought-tolerant plants with hard sclerophyllous evergreen leaves, as contrasted with ...

Chaparral - Wikipedia

How Many People Can Our World Support? No species has altered the Earth's natural landscape the way humans have. Our impact is so extensive that we are crossing into a new geologic epoch - the Anthropocene - propelled by human behavior. Global climate change, mass extinction, and overexploitation of our global commons are all examples [...]
