Curved Mirror Ray Diagram Answers

Step-by-Step Method for Drawing Ray Diagrams. The method for drawing ray diagrams for concave mirror is described below. The method is applied to the task of drawing a ray diagram for an object located beyond the center of curvature (C) of a concave mirror. Yet the same method works for drawing a ray diagram for any object location.

Ray Diagrams - Concave Mirrors

A ray diagram is a tool that is used to determine the location, size, orientation, and type of image formed by a mirror. Ray diagrams for concave mirrors were drawn in Lesson 3. In this lesson, we will see a similar method for constructing ray diagrams for convex mirrors.

Ray Diagrams - Convex Mirrors

Drawing Ray Diagrams for Concave Mirrors Points to remember when drawing ray diagrams involving concave mirrors: 1. When an incident ray travels parallel to the principal axis, it is reflected through the focal point (F).
