Mathematics Objective Type Questions With Answers ...

Mathematics is neither subjective nor objective, it is abstract. When mathematical abstractions are applied to the real world, then it is subjective, but not mathematics, it is an application of mathematics. When we use a mathematical model for some real application, we believe, subjectively, that the axioms give an approximation to reality.

50 Multiple Choice Questions - Gonit Sora

I. Choosing Between Objective and Subjective Test Items There are two general categories of test items: (1) objective items which require students to select the correct response from several alternatives or to supply a word or short phrase to answer a question or complete a statement; and (2) subjective or essay items which permit the student to organize and present an original answer.

Improving Your Test Questions

Any square root that is not a perfect root is an irrational number These numbers include the non-terminating, non-repeating decimals (π , 0.45445544455544445555..., $\sqrt{2}$, etc.). Any square root that is not a perfect root is an irrational number. For example, 1 and 4 are rational because $1 = 1$ and $4 = 2$, but 2 and 3 are irrational-there are no perfect squares between 1 and 4.[represent root]
