The Profile of Mood States (POMS) original scale contains 65 self-report items using the 5-point Likert Scale. Participants can choose from 0 (not at all) to 4 (extremely). The test takes approximately 3 to 7 minutes for healthy participants, and longer for the physically ill.

Profile of Mood States (POMS) - Statistics Solutions

Mathematics (from Greek μάθημα *máthēma*, "knowledge, study, learning") includes the study of such topics as quantity, structure, space, and change.. Mathematicians seek and use patterns to formulate new conjectures; they resolve the truth or falsity of conjectures by mathematical proof. When mathematical structures are good models of real phenomena, then mathematical reasoning can ...

Mathematical economics is the application of mathematical methods to represent theories and analyze problems in economics. By convention, these applied methods are beyond simple geometry, such as differential and integral calculus, difference and differential equations, matrix algebra, mathematical programming, and other computational methods. ...

Information Overview. For students who perform exceptionally well on the AMC 10/12, they are invited to continue participating in the AMC series of examinations that culminate with the International Mathematical Olympiad (IMO). The first in this series is the American Invitational Mathematics Exam (AIME), followed by the USA Mathematical Olympiad and Junior Mathematical Olympiad (USAMO and USAJMO).

Calculus: Modeling and Application, 2nd Edition, by David A. Smith and Lawrence C. Moore of Duke University, responds to advances in technology that permit the integration of text and student activities into a unified whole. In this approach, students can use mathematics to structure their understanding of and investigate questions in the world around them, to formulate problems and find ...

Computing the convex hull is a problem in computational geometry. The indices of the points specifying the convex hull of a set of points in two dimensions is given by the command `ConvexHull[pts]` in the Wolfram Language package `ComputationalGeometry``. Future versions of the Wolfram Language will support three-dimensional convex hulls. A makeshift package for computing three-dimensional convex ...
